Allowable Subject Matter

1. Claims 1-22 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art neither anticipates nor renders obvious an apparatus (claim 1) or method (claim 18) for adjusting a depth of a table mounted plunge router, specifically wherein the adjustment mechanism enables the movement of the claimed slide in the claimed groove, with a cable in a cable housing for connecting the claimed slide to the router.

The use of adjustment devices, including threaded adjustment rods, for routers is well known in the art.

The closest prior art is US Pat. No. 5,590,989 (Mulvihill, hereafter '989) teaches a flexible cable for use in an adjustment mechanism for a plunge router. '989 teaches it is well known in the art to have a router equipped with a long threaded adjustment rod which projects up from the router base and through a portion of the router housing (see col. 1, lines 44-60). '989 teaches the use of a flexible cable with extension 102 and inner sleeve 110 (see figure 4a).

'989 does not disclose the slide disposed in the groove for movement of a slide or the adjustment mechanism enabling the movement of the slide in the groove.

Therefore '989 does not anticipate the claimed inventions of independent claims 1 or 18.

Furthermore, there is no prior art, either alone or in combination with '989, that would render obvious the claimed invention, and no motivation found to modify a router to include the limitations of the slide as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
